NEW SOUTH WALES

STATISTICAL REGISTER.

1938-39.

PREFACE.

THE seven sectional parts of this volume have already been issued separately, and are now presented collectively, accompanied by a General Index covering the subjects treated. Every care has been taken to keep the work free from errors but if any have escaped detection it would be deemed a favour if their nature were indicated.

The figures should be read in conjunction with the "Official Year Book of New South Wales."

The Government Statistician wishes to express his thanks to the Commonwealth Statistician, to the responsible officers of the various State and Commonwealth Departments, and to others, who have supplied all desired information, often at considerable trouble.

Bureau of Statistics and Economics,
Sydney, 1*st April,* 1941.

No. 20.—Imports Oversea, 1938-39.

(From 1st July, 1938, to 30th June, 1939.)

Note.—With the exception of the United Kingdom, the Irish Free State, and New Zealand, and in cases where a single country is concerned, only those countries are shown under each article where the value of import exceeds £500. Particulars in the following table refer to "Country of Origin"; details of country of direct shipment are not available.

Value of Imports:—The value of goods imported from countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154 (1) of the Customs Act, 1901–1930, provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following :—

(*a*) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(ii) the current domestic value of the goods, whichever is the higher;

(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export; and

(*c*) ten per centum of the amounts specified under paragraphs (*a*) and (*b*) of this sub-section."

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country."

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where imports have been declared in packages without an indication of the number, capacity, or weight of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included."

Where reference has been made by footnote against any article in this table, more complete details may be obtained on reference to the Customs Statistical Classification.

No. 21.—Exports Oversea, 1938-39.

(From 1st July, 1938, to 30th June, 1939.)

Note.—With the exception of the United Kingdom, Irish Free State, and New Zealand, and in cases where a single country is concerned, only those countries are shown under each article where the value of the export exceeded £250.

Goods exported overseas are shown under two headings:—"Australian Produce" and "Total." "Australian Produce" comprises (i) Raw materials produced in Australia; (ii) Articles manufactured therefrom; and (iii) Articles wholly or partly manufactured in Australia from imported materials.

The difference between the value of Australian produce exported and the total export represents the re-export of articles produced elsewhere than in Australia.

Value of Exports.—The value of goods exported is recorded in Australian currency, and includes the cost of containers. Until 30th June, 1937, the commodities were assessed at their value in the principal markets of the Commonwealth, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows:—

From 1st July, 1929, to 30th June, 1937.—*Sugar* (*a*) sold in Australia for export: The value f.o.b., at which the sugar was sold to oversea buyers; (*b*) shipped on consignment: The f.o.b. equivalent of the ruling price of such sugar in the London markets.

Goods on which bounty or rebate is payable on export.—The value in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From 1st July, 1930, to 30th June, 1937.—*Wool* (*a*) sold in Australia for export—the actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship; (*b*) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932, to 30th June, 1937.—*Wheat* (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the wheat was sold; (*b*) shipped on consignment; The f.o.b. equivalent of the current selling price overseas.

From 1st April, 1934, to 30th June, 1937.—*Butter** (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the butter was sold; (*b*) shipped on consignment: The f.o.b. equivalent of the current ruling price overseas.

From 1st July, 1934, to 30th June, 1937.—*Flour* (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the flour was sold; (*b*) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1937, the following values have been adopted for exports generally: (*a*) Goods sold to oversea buyers before export: The f.o.b. equivalent of the price at which the goods were sold, *e.g.*, as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship; (*b*) Goods shipped on consignment: The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale. As regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received.

Quantities.—Generally, though not invariably, quantities have been shown in the ordinary trade unit. Where exports are declared in packages, without an indication of the number, capacity, or weight of the articles exported, only the values are inserted.

N.E.I.—Means "Not elsewhere included."

Ships' Stores.—Goods shipped as ships' stores on board oversea ships have not been included in exports. For ships' stores, see Table No. 22.

NOTE—The duties charged on imports into the Commonwealth during 1938-39 were collected in accordance with the Customs Tariff, 1933-1938, and subsequent Tariff Proposals. Dumping duties on certain imports were charged under the provisions of the Customs Tariff (Industries Preservation) Act, 1921-1936. Primage duty has been imposed since 10th July, 1930, on all goods (except those specially exempted), whether dutiable or not, in addition to duties collected in accordance with the Customs Tariff. The initial rate of 2½ per cent. ad valorem was increased to 4 per cent. as from 6th November, 1930. By a further amendment which came into operation on 11th July, 1931, certain aids to primary production and some minor imports were exempted from primage duty, a rate of 4 per cent. ad valorem was imposed on a few other items, mainly aids to production, and the primage duty on all other articles was increased to 10 per cent. ad valorem. Further amendments removing or reducing primage duties have operated at various dates; the amendment of 5th October, 1933, provided for exemptions, rates of 4, 5, and 10 per cent., and preferential treatment to certain goods admitted under the British Preferential Tariff. Since 1st January, 1937, preferential treatment has been extended to specified items admitted under the Intermediate Tariff. Amounts deducted under the Customs Tariff (Exchange Adjustment) Act, 1933-1936, which commenced to operate on 5th October, 1933, are not included in the gross customs duty figures shown above. Excise duties are collected in accordance with the provisions of the Excise Tariff, 1921-1938, and subsequent Excise Tariff Proposals taking effect on 1st January, 1938, and 5th May, 1938. * Includes Bond rent, Carriage and Agent's Fees, Licenses, Sale of Acts, Fines under Custom and Excise Acts, King's Warehouse charges, Testing Hydrometer and Translation Fees, etc.

Section II.—SHIPPING.

Notes.—(1) *The shipping returns of New South Wales are exclusive of ships of war, cable-laying vessels, yachts and vessels trading only between ports of New South Wales.*

No. 53.—Harbour and Wharfage Rates at 30th June, 1939.

Harbour and Wharfage Rates in the port of Sydney and in other ports are collected by the Maritime Services Board of New South Wales. Inward rates are payable in respect of goods brought by sea for landing, and outward rates on goods shipped on a vessel. Special inward rates are prescribed for certain articles produced and shipped within the Commonwealth, and the inward rates for other goods are those shown under the heading of General Rates. At ports other than Sydney separate schedules of rates apply to coastwise goods. In Sydney Harbour outward rates are not levied on any consignment under 5 cwt. or 10 cubic feet. Goods transhipped are subject to transhipment rates, and not to inward or outward harbour or wharfage rates. Passengers' luggage is exempt.

STORAGE CHARGES—Port of Sydney.—If goods remain on unleased wharves or in the shed erected thereon, longer than six days after the final discharge of a vessel, wharf storage charges are levied against the owner or agent of the owner of the Goods, the rate per ton per day being 4d. for the first week, 5d. for the second week, 6d. for the third week, and 7d. thereafter. If goods remain on unleased wharves longer than two days after being received for shipment, the wharf storage charge is 1d. per ton per day. For the purpose of calculating this charge one ton is considered as representing 630 feet super in the case of softwood timber and 384 feet super in the case of hardwood timber.

The charges for storing timber at certain wharves, after two days, are at the rate per day of 1d. per ton during the first four days, thereafter 3d.

* No quotations. † Woolly. § Woolly and shorn.

NOTE.—The above prices for sheep represent the averages for all sheep, whether shorn or woolly but as a general rule in January and February the fat sheep at market are shorn; during March and April they have growing fleece; from May to August they are woolly and in September, October, November, and December they comprise both shorn and woolly. Relatively few crossbred wethers and ewes are marketed.

(a) Exclusive of Australian Capital Territory.

(b) The areas of Homestead Selections and Homestead Grants cannot be separated.

(c) This area is exclusive of Crown lands held by virtue of Miners' Rights and Business Licenses, the extent of which is not known; also lease areas applied for and in occupation under the Mining Act, 1906, but not yet confirmed.

(d) In addition there were in the Western Division the following areas held under the Western Lands Act: perpetual conditional leases, 68,643 acres; ordinary conditional leases, 30,030 acres; ordinary occupation licenses, 256,431 acres; preferential occupation licenses, 149,784 acres; permissive occupancies, 206,211 acres. These particulars have been included in item *Western Lands Act* under captions *Held under Perpetual Lease* and *Other Occupation*.

(e) See note (d).

(—) Denotes that the area which was issued (by grant, lease, or conversion) was less than the area which expired, or which was revoked, forfeited, or converted into other tenures.

† During the year 43 dedications were revoked totalling in area 1,180 acres, which have not been taken into account.

‡ Although Homestead Grants are perpetual leases, they are virtually alienated and have therefore been included in this table.

Surrenders, Exchanges, and Road Resumptions.—Surrenders and exchanges are effected under Sections 195, 196, and 197 of the Crown Lands Consolidation Act, 1913, and Road Resumptions are treated under the Public Roads Act, 1902. As land is exchanged for land without any monetary consideration the extent of the area of Crown Lands is not thereby affected.

Resumptions and Purchases.—The total alienations represent the gross area, no allowances being made for the gifts of land and the resumptions and direct purchases made from private owners on behalf of the various Departments, for particulars of which see Table No. 84.

NOTE.— This information is now tabulated triennially, and is not available for years since 1915-16 other than those shown.

* From the year 1919-20 the returns were collected only from holdings over one acre in extent on which improvements had been effected, and upon which agricultural or pastoral activities were conducted. In previous years many holdings, nearly all from 1 to 5 acres in extent were included, which were not used for agricultural or pastoral purposes.

Section III.—METEOROLOGY.

The Tables in this Part have been compiled from particulars furnished by the Commonwealth Meteorologist.

No. 90.—Barometric Observations, Sydney, 1939.

Time Ball.—The Time Ball at the Sydney Observatory is dropped every day at 1 p.m. Standard Time. The Time Ball at Newcastle is controlled by signals from the Sydney Observatory.

Standard Time.—The mean time of the 150th meridian of longitude east of Greenwich, England, is the Standard Time throughout New South Wales, with the exception of the area within the Municipal District of Broken Hill and the Electorate of Sturt, for which the mean time of the 135th meridian of east longitude is adopted.

Position of Sydney Observatory.—Latitude, 33° 51′ 41·1″ south; longitude, 151° 12′ 23·10″ east; altitude, 138 feet.

Month.	Self-registering Barograph, corrected to 32° Fah. and Standard Gravity at Lat. 45°, but not to Mean Sea-level. Height above mean sea level :—138 feet.						Mean Height of Standard Barometer, corrected to 32° Fah. Gravity and Mean Sea-level.

Thermometers.—Up till April, 1917, the thermometers were exposed in a shed 11 feet square, of which the sides were 5 feet 6 inches high, and enclosed to within about 30 inches of the ground with open lattice work. The roof was conical, rising to 13 feet above the ground, and was covered with louvres close enough to keep out rain. From April, 1917, the thermometers have been exposed in a standard Stevenson screen.

NOTE.—The above tables are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in the frontispiece of the Official Year Book of New South Wales and listed in tables in other parts of this Volume. Where divisions in the above table are subdivided into two sections the letters N, S, E, or W indicate the northern, southern, eastern or western portion of the division concerned.

NOTE.—The above table shows the ratio of actual to normal rainfall each month, the normal rainfall being the average over a long period of years ended 1929.

No. 103.—Meteorological Conditions, New South Wales, 1938.

The dry conditions prevailing in the latter months of 1937 continued in 1938 until May, when the position was relieved by widespread rains. Dry weather followed and in every division of the State total rainfall for the year was below normal. The deficiency in the Coastal and Northern areas was comparatively slight, but in the hinterland drought conditions prevailed.

Temperatures.—In January, despite early heat wave conditions, temperatures were mostly below normal, with relatively mild nights. February was a comparatively cool month, but in March temperatures were generally above average. April temperatures at most stations were higher than usual. Mild conditions prevailed in early May, but towards the end of the month frosts were fairly general throughout the State. June temperatures were variable, with frosts and cold winds. Average temperatures ruled in July, with extensive snowfalls in the Highlands. Fogs and frosts occurred at intervals. August temperatures showed a slight recession, and snow fell on the Central and Southern Highlands. The northerly winds of September raised day temperatures slightly above normal at most stations. October temperatures, except in the Southern Tablelands, were everywhere above average, and persistent northerly winds resulted in hot and sultry conditions. Throughout November inland readings were high, and a number of coastal stations registered over 90 degrees. Excessive dryness and continuously high temperatures were the chief characteristics of the weather during December.

The highest temperature recorded during the year was 119 degrees at White Cliffs on 20th December and the lowest 1 degree at Kiandra on 7th July.

Wind.—The maximum wind velocity measured at Sydney was 75 miles per hour on 10th December.

The following is a resumé of the weather conditions experienced during each month of the year :—

January.—Dry conditions prevailed over the Central Inland sectors comprising three-fourths of the area of the State. In the second half of the month the Coastal divisions received bountiful rains, the 579 points registered at Sydney on 31st being one of the highest daily falls recorded for January. The highest temperature experienced was 114 degrees at Bourke and Brewarrina.

February.—With the exception of the North Coast and the South-western Slopes all divisions showed rainfall deficiencies during the month. The maximum temperature was 112 degrees at White Cliffs.

March.—Excessively dry conditions persisted throughout March. Many stations in the Western Division, Plains and Riverina were rainless, while other areas received light falls. Heat wave temperatures further aggravated the position. Temperatures reached 110 degrees at Brewarrina and Cobar.

April.—This month saw a display of cyclonic activity. Useful rains were received in the northern parts of the State and in the Eastern Riverina. Dense dust storms over inland areas resulted in hazy conditions, which extended to the coast. Wilcannia with 99 degrees recorded the highest temperature.

May.—During May heavy falls of rain occurred along the northern border of the State. The disturbance moved southward with beneficial results to the whole State with the exception of the south-western sector. Temperatures were above normal, the maximum being 89 degrees at Collarenebri.

June.—Useful rains fell in inland areas, but the aggregates for the month in practically every division were well below the average. Cold and frosty conditions prevailed and snow was frequent on the Alps.

July.—Conditions continued dry. Light to moderate rains were received in western, southern and central areas, but the wheat belt received little benefit. Fogs and low night temperatures occurred at intervals throughout the month, and a minimum of 1 degree was recorded at Kiandra.

August.—Widespread and soaking rains fell throughout August. The Sydney catchment area received up to 20 inches and all water restrictions were lifted. Tibooburra with 86 degrees registered the highest temperature.

September.—The flood rains of August were followed by a remarkably dry September. Almost without exception totals in the Plains, Riverina and the Western Division were under one inch, and the wheat areas suffered accordingly. The maximum temperature was 92 degrees at Grafton.

October.—Very useful rains were received in October and practically the whole of the State benefited. Heat wave weather was prevalent over most of the State, and Bourke recorded the highest reading with 102 degrees.

November.—Hot sultry weather with northerly winds persisted throughout November. Thunderstorms were frequent over the Central and Eastern Areas, but with the exception of the northern portion of the State rainfall was below the average. The highest temperature experienced was 106 degrees at White Cliffs.

December.—Temperatures were consistently high with little rain. Scattered thunderstorms and strong winds created unsettled conditions, which culminated in a hurricane on the tenth of the month. This wind, which had a measured velocity of 75 miles per hour at Sydney, swept the southern part of the State. The highest temperature recorded was 119 degrees at White Cliffs.

No. 104.—Monthly Rainfall, 1919-1938—Representative Stations in Divisions.

NOTE.—For monthly rainfalls at Representative Stations from the earliest date available in each case to 1906 see Statistical Register, 1924-25. In table No. 106 the average annual rainfall, over a period of years, is given at a number of stations.

NOTE.—(—) Denotes no record, and (...) no rainfall during the month.

PART III—FINANCE AND LOCAL GOVERNMENT.

Section 1.—PUBLIC FINANCE.

No. 1.—State Revenue and Expenditure, 1929 to 1939.

The following table represents a combined statement of the revenue operations of the Governmental section of the State accounts, the chief business undertakings of the State, and the road vehicles registry and traffic control branch. It does not embrace all State activities but is sufficiently comprehensive to indicate the condition of State finances on revenue account. The most important omission is the Main Roads Department whose accounts are summarised in Table 9.

The Governmental section consists of the Consolidated Revenue Fund, the Family Endowment Fund until 1931–32, and the Unemployment Relief Fund in 1930–31 and 1931–32. The Family Endowment and Unemployment Relief Funds were merged with the Consolidated Revenue Fund as from 1st July, 1932. These and the Road Transport and Traffic Fund are on a "cash" or "receipts and payments" basis, but the revenue and working expenses of the business undertakings are on an "income and expenditure" basis. The public debt charges represent the actual payments of interest, exchange on interest, and sinking fund in respect of all activities included in the table.

A dissection of Governmental revenues and expenditures is shown in Tables 2 to 4, and of the Road Transport and Traffic Fund in Table 8. The profit and loss of business undertakings, after allocating debt charges thereto, are shown in Table 7.

* Gross profit represents proceeds of sale of Lottery tickets less prize money. Expenses of conducting lotteries are charged as Governmental expenditure.

† Portion paid to Consolidated Revenue Fund only—other amounts are paid into Special Deposits accounts and expended on special purposes.

‡ Includes exceptional items ; viz., in 1932–33 transfer from Main Roads Funds £200,000; in 1933–34 transfer from Government Insurance Funds £300,000 and Liquor Compensation Fund £250,000; in 1937–38 profits on working and realisation of industrial undertakings £442,230.

No. 3.—Governmental Expenditure—Functional Classification, 1933 to 1939.

NOTE:—The ordinary departmental expenditure in this table exceeds by £800,000 each year the Governmental Expenditure as shown in Table 1. The difference is due to the omission from Table 1 of an annual inter-fund payment of £800,000 from Consolidated Revenue Fund to Railways in respect of losses incurred on developmental railway lines.

* Exclusive of interest, exchange and sinking fund charges paid on Loans expended on Unemployment Relief Works.

† Conducted as separate undertaking until 1936-37.

‡ Amounts shown represent total interest, exchange and sinking fund charges paid by the State, less amounts recouped by business undertakings, Main Roads Dept. and other activities outside the Consolidated Revenue Fund. When undertakings, etc., incur losses their debit charges are not fully recouped and the deficiency is reflected in the amount charged under "Governmental."

‡ Annual interest is a calculated amount representing one year's interest on the debt outstanding at 30th June. The distribution of the total amount, *i.e.*, £12,935,504, according to place of payment, was: Australia £6,454,738 (Australian currency), London £5,864,598 (Sterling) and New York £616,168 (amount payable in dollars, converted at rate of $4·8665 to £). The amount of interest actually paid and the exchange cost of paying overseas interest is shown in Table 21.

* Includes balance of old Sinking Fund Account transferred to National Debt Sinking Fund, £30,061.

† Face Value of redeemed and repurchased Securities at 30th June, 1939 was: Australia £7,139,896, London £8,997,690, New York £1,516,901 — and Total, £17,654,487.

In terms of the Financial Agreement, contributions are paid annually to the National Debt Sinking Fund in respect of New South Wales debt, as follow:—

1. For period of 58 years from 1st July, 1928, on net debt outstanding at 30th June, 1927—
   - (*a*) 2s. 6d. per cent. by Commonwealth.
   - (*b*) 5s. per cent. by State.
2. For period of 53 years on new loans raised subsequently to 30th June, 1927, other than for the funding of revenue deficits—
   - (*a*) 5s. per cent. by Commonwealth.
   - (*b*) 5s. per cent. by State.

Upon agreement that a loan expended on wasting assets should be redeemed within a shorter period, the State's contribution is increased to provide for redemption within the period fixed, allowing for accumulation at 4½ per cent. compounded.

3. On loans raised to meet a revenue deficit accruing after 30th June, 1927, at least 4 per cent., payable by the State, to be accumulated at 4½ per cent. per annum, compounded.
4. Interest on cancelled securities at the rate of 4½ per cent.

Under arrangements external to the Financial Agreement, additional contributions are paid by the State to recoup amounts appropriated from the Sinking Fund for discounts on conversions since November, 1936. The additional contributions are spread over the currency of the conversion loans, and the first payment was made in 1938–39.

* Amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

† The index is based upon the amount of clearings as adjusted to eliminate the effects of bank amalgamations and Treasury Bills and other special transactions on account of governments. The index shown for each month is the average of ratios for that month and the two preceding months, obtained by relating the amount of clearings for each month to the average of the clearings for the corresponding month in the base period 1926–30. This average is represented by 100 for each month.

* All companies incorporated outside New South Wales are required to register as foreign companies if they carry on business in New South Wales.

† Excluding two ephemeral companies, capital £112,000,000

‡ Existing companies registered as proprietary companies under the Companies Act, 1936, numbering 4,180 in 1937, 149 in 1938, and 25 in 1939, are not included as new companies registered.

§ Includes new companies registered as proprietary companies, viz., 925 with a nominal capital of £15,678,415 in 1937, 786 with a nominal capital of £11,746,903 in 1938, and 811 with a nominal capital of £12,840,725 in 1939.

No. 54.—Stock Exchange Index (Sydney) 1928-1939.

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of twenty-four miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares issued.

Average for Month.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total: 75 Companies.	34 Active Shares included in foregoing.

* *Amount of Consideration.*—Many mortgages do not state the amount lent under them, and many discharges do not disclose the amount received in consideration. The figures representing " Amount of Consideration " under both these heads are therefore considerably less than the amounts actually advanced or repaid.

† Loans secured by both liens on wool and mortgage on sheep are included under both headings. The amount duplicated is shown separately under the heading " Amount secured both by lien on wool and mortgage on sheep included under both."

‡ Information not supplied in all cases.

§ Liens on wool and on growing crops mature at the end of each season and terminate without formal discharge. Also many mortgages of stock come to an end without formal discharge.

No. 80.—Estates in New South Wales Assessed for Probate and Settlement Duty—Year ended 30th June, 1939.

NOTE.—The rates of duty quoted were imposed under the Stamp Duties Amendment Act, 1933. Half rates are charged if the property passes to the widow or children under 21 years of age, if the total net value of the estate is under £5,000. Total exemption is granted in the case of local domicile where estate is under the value of £500, and if under £1,000, property passing to widow and/or children under 21 years of age is exempt.

* Particulars as at 31st December, 1938. † Excludes Australian Capital Territory.

No. 86.—Municipalities—Valuations and Rates for Year ended 31st December, 1938.

NOTES. 1—In this table the *Unimproved Capital Value* is the amount which the fee-simple estate in such land is worth under such reasonable conditions as a *bonâ-fide* seller would require, assuming the actual improvements had not been made.

The *Improved Capital Value* is the amount which the fee-simple estate of the land is worth, with all improvements and buildings thereon.

The *Assessed Annual Value* is nine-tenths of the fair average rental of land with improvements thereon.

2—**The maximum amount of rates leviable in a municipality is limited as follows**, but may be increased with the Governor's approval :—

(*a*) General Rate—The yield of 2d. in £ on the U.C.V., plus the yield of 1s. 6d. in £ on the A.A.V.

(*b*) All rates (other than Water and Sewerage) :—The yield of 2d. in £ on U.C.V., plus 2s. in £ on the A.A.V.

(*c*) Water or Sewerage Local Rate alone.—The yield of 2s. in £ on the A.A.V. of land ratable to the local fund.

The general rate levied in respect of urban farm land within a country municipality is limited to (*a*) one half of the general rate levied in respect of other land, or (*b*) the general rate levied in an adjoining shire, whichever is the greater. The general rate quoted in the following table is that which applies to non-farm lands.

No. 114.—Shires—Valuations and Rates for Year ended 31st December, 1938.

NOTES.—(1) In this table the *Unimproved Capital Value* is the amount which the fee-simple estate in such land is worth under such reasonable conditions as a *bona-fide* seller would require, assuming the actual improvements had not been made.
The *Improved Capital Value* is the amount which the fee-simple estate of the land is worth, with all improvements and buildings thereon.
The *Assessed Annual Value* is nine-tenths of the fair average rental of land with improvements thereon.

(2) The maximum amount of rates leviable in a shire is limited as follows but may be increased with the Governor's approval:—
(*a*) General Rate.—The yield of 2d in £ on the U.C.V.
(*b*) All Rates in Urban Areas (other than General, Water, and Sewerage).—The yield of 2s. in £ on A.A.V. of ratable land in the Urban Areas.
(*c*) Water or Sewerage Local Rate alone.—The yield of 2s. in £ on A.A.V. of land ratable to the Local Fund.

No. 134.—County Councils, Electricity Undertakings, 1938.

The St. George, Clarence River, and Bega Valley County Councils were constituted for the purpose of supplying electricity to constituent bodies, which are :—

(*a*) St. George.—Municipalities of Kogarah, Hurstville, Rockdale, and Bexley. (Current purchased from Railway Commissioners.)

(*b*) Clarence River.—Municipalities of Grafton, South Grafton, and Ulmarra, and the Shires of Orara, Nymboida, and part of Copmanhurst. (Current generated by Council.)

(*c*) Bega Valley.—Municipality of Bega and the Shires of Imlay and Mumbulla. (Current generated by Council.)

The Sydney County Council commenced operations on 1st January, 1936, when it assumed control of the Electricity Undertaking previously conducted by the City of Sydney. It supplies electricity direct to consumers in the city and in 32 suburban municipalities, and in bulk to 10 other municipalities and 4 shires and to a private company for distribution within a municipality and a shire.

FACTORY STATISTICS.

SCOPE OF THE STATISTICS AND DEFINITIONS OF TERMS USED.

Scope.—The statistics are compiled annually and show—

Number and size of factories; number of persons employed in various categories; salaries and wages paid; rated horse-power of engines ordinarily in use and those in reserve or idle; book value of land, buildings, plant and machinery (not capital invested); value of material, containers, repairs and replacements, power, fuel and light (including water and lubricating oil) used in factories; quantities and values of fuel used; value of output; value of production; and quantities and values of principal materials and articles of output.

Factory.—For the purposes of the statistics a " factory " is an establishment in which four or more persons are employed, or power (other than manual) is used, in any manufacturing process.

Average Number of Persons Employed.—

(A) *During Period of Operation* represents the aggregate of the average number of employees in each factory—the average being calculated for the period the factory was operating during the year.

(B) *During the Whole Year* represents the aggregate of the average number of employees in each factory—the average being calculated for the period of twelve months.

All persons employed in the manufacturing activities of a factory are counted as factory employees, including operatives, managerial and clerical staff at the factory, working proprietors and " out workers." Persons engaged in selling and distribution, such as salesmen, travellers and carters engaged solely on delivery of manufactured goods are not included.

Rated Horse Power of Engines Installed.—Statistics of power used in factories other than central electric generating stations relate to the " rated horse-power " of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of central electric generating stations the figures refer to the " rated capacity " of engines and generators installed.

Value of Materials used includes the value, as at the factory, of the materials and stores used, containers, tools replaced, and materials used in repairs to plant. The following are exceptions :—

(*a*) Where factory operations consist of assembling manufactured parts of machines, motor cars, etc., the value of the parts is not included;

(*b*) Where goods in bulk, *e.g.*, tobacco, tea, are made up in packets the value of the bulk goods is not included;

(*c*) The value of customers' materials made up or treated is not included.

Value of Fuel, etc., Consumed.—This item includes not only coal, coke, oil, gas, wood, etc., but the cost of electric power and light used. For convenience the cost of lubricants and water used are also included under this heading.

Value of Output is the value of the goods manufactured or work done. It is based generally on the wholesale value at the factory, exclusive of cost of delivery and of excise duty (if any).

Value of Production is the value added to materials by the processes of manufacture. It is calculated by deducting from the value of output the value of materials and fuel used (as defined above).

[*Note.*—Materials, fuel, output and production are valued as at the factory.]

THE FORM AND INSTRUCTIONS.

A copy of the front of the Form issued to proprietors of factories is reprinted on the following page. Provision is made on the back of the form for the collection of particulars of materials used and articles produced.

A copy of the instructions issued for the guidance of those responsible for furnishing the information is also shown.

INSTRUCTIONS TO PERSONS FILLING IN FACTORY RETURNS.

General.

1. *These returns are collected under the authority of the "Census Act, 1901," and any person concerned who refuses or neglects to answer any of the questions on the return is liable to a penalty of £20. An extension of time will not be granted unless it can be shown that it is impracticable to supply the return within the time allowed.*

2. *Your returns will be regarded as strictly confidential. The information given in these forms is used only for statistical purposes to arrive at aggregate for each kind of industry in the State. The contents of individual returns are not disclosed in any way, and no other department, or officer unattached to this office, is permitted to see them.*

3. *Several Industries in One Establishment.*—In large establishments where two or more industries are carried on, separate forms will be supplied, which should, if practicable, be filled in for each industry. The particulars relating to the whole establishment should be allocated, as nearly as possible, to each industry.

4. The line "Nature of Work Done" should be used for a brief description of the main operations or processes carried out, *e.g.* Brickmaking, Shirtmaking, Motor Repairing, Bread Baking, Sawmilling, etc.

5. Where a manufacturing business is carried on in connection with a wholesale or retail trading business, the return must be restricted to the details of the *manufacturing branch only.* That portion of the premises used for manufacturing purposes should be separately valued and shown under Part C. *Particulars concerning Salesmen, Travellers, Collectors, and Retailing Storemen must NOT be included with persons employed in the factory, or in salaries and wages paid.*

Explanation of Items Required.

6. *Period Worked.*—The time the establishment was working during the year is to be given in calendar months, holidays during working period being also included.

7. *Average Number of Persons Employed.*—Part A.—This means the average for the period of operation. For example, for an establishment working the whole year the average will be the sum of the *total* employess for each week of the year divided by 52; the average for an establishment working three months will be the sum of the weekly totals divided by 13, and similarly with other periods. The total of the average numbers employed must be distributed under the various groups as shown.

Note.—*Carters* (on wages—not contractors) employed in bringing material for manufacture should be included, but not those engaged entirely *in the delivery of manufactured goods,* as the value of output of such goods is the wholesale selling value at works, and exclusive of all delivery costs or charges. If the carter's work be divided in this respect, however, he should be included.

8. *Salaries and Wages Paid.*—Part A:—

Working Proprietors.—Where a working proprietor is engaged wholly or partly in the manufacturing section of his business, either by way of superintending or actual work, such time has a salary or wage value, which he may pay to himself either directly by weekly or other periodical "drawings," or else indirectly in the profits of the business. This is the value that is required to be shown, and *would probably be equal to what he would have to pay another person for the same services.*

Other Employees.—The total amounts of salaries or wages paid to all employees during the year are required to be given.

9. *Engines employed to Drive Machinery.*—Part B.—In furnishing particulars of the number and rated horse power of engines in their works, firms are required to show separately those ordinarily in use and those in reserve or idle during the year. These terms are intended to cover respectively, engines in use for the greater part of the year, even though not working to their full capacity; and engines not in use, or only in use occasionally, as during periods of breakdown to machinery ordinarily in use. Care should be exercised to see that obsolete engines are omitted. If the same power is used in the one establishment for more than one "industry," the horse power of the engines should be allocated, if practicable as indicated in 3 above. In such circumstances, if the *number* of engines cannot be readily allocated on the same basis, show the number on the form relating to the "industry" which consumes the larger part of the power.

10. *Value of Land and Buildings used for Works and Factory Purposes.*—Part C.—Where the Land, Buildings and Fixtures are the property of the occupier, the values stated should be the depreciated values or book values less any depreciation reserve existing in respect of them. If the premises are rented, state the amount of rent paid, exclusive of rates and taxes.

11. *Value of Machinery and Plant.*—Part C.—This should include the value of all machinery, implements, and tools used; also plant for the conveyance of raw materials (such as trams, carts, horses, etc., and casks in the case of a brewery). In brickyards, potteries, and glassworks the value of the kiln should be included under this head, and not as a building. The values stated should be the depreciated values or book values less any depreciation reserve existing in respect of them. Where rent is paid for machinery the amount paid must be stated in Part C on the front of the form.

12. *Cost of Power, Fuel and Light Used.*—Part D.—Care should be exercised to see that the costs are not duplicated in any of the other items. Coal used in the manufacture of coke and gas should not be included here but shown as a raw material opposite Item (vi). Fuel used in Blast Furnaces and Smelting Furnaces should be similarly treated.

13. *Materials used, etc.*—Part D Item 12.—The value quoted should be the cost landed at the factory of the materials actually used during the year. This is not necessarily the same as the amount expended during the year for the purchase of materials.

Making-up or Treating Customers' Materials.—If the values of the materials are not known, include in Part D Item 12 the value (cost) of maker's own materials, such as trimmings, cottons, etc. (dyes, etc., in dyeing) used, and in Part E, Item 14 B, the amount charged to customers for making-up or treating their materials.

Repair Work of any Kind.—The value (cost) of all materials used in repairing should be included in Part D, Item 12 while the amount charged for making repairs should be shown in Part E, Item 14 B.

Assembling the Manufactured Parts of Machines, Motor-cars, etc.—Where manufacturing operations consist only or partly of assembling the manufactured parts of machines, motor-cars, etc., the value of the parts should not be included in the cost of materials used, nor in the value of output. The latter value should be shown in Part E, Item 14 B, and should include the actual labour cost of assembling the parts, cost of fuel and power used, any additional expenses of assembly, and profit made on such work.

Finished Goods Purchased for Re-sale.—The value of finished goods purchased for re-sale without treatment must not be included anywhere.

14. *Value of Output.*—Part E, Items A—B.—This refers only to goods actually made during the year, including by-products, and must not be confused with goods sold during the year, which in most cases include some goods made in the previous year. That portion of the goods manufactured and remaining unsold at the end of the year should be valued at current rates.

Goods in Process of Manufacture.—The value of goods in process of manufacture at the end of the year must also be included in the value of output. Care must be taken to see that the value of goods in process of manufacture at the beginning of the year is excluded.

Costs of Installation, etc.—Where the selling price of manufactured goods includes installing or fixing (shop and window fittings, tiles, fibrous plaster-sheets, etc.) the charges for transport, installation, erection or fixing of such goods must be deducted in valuing output in Part E, Item 14 A. Employees engaged in such work and their wages should also be excluded from Part A.

15. *Excise.*—Excise must not be included in the value of any article manufactured.

16. *Bounty.*—The amount received as bounty on the production of any article must be included in the value of goods manufactured (Part E).

Directions Relating to Special Industries.

17. *Newspapers, Magazines, and Journals.*—If the newspaper, magazine, or journal is printed by the proprietors, only the persons employed in the printing should be included in the return. The value of the output need not be stated, but all other particulars must be furnished. In other cases, where the newspaper or journal is printed for the proprietors by another person, it should be treated in the return of the printer as ordinary job printing.

18. *Food-packing, Tobacco-cutting and Packing, Tea-blending and Packing, Bottling and Grading Establishments.*—In these and other similar establishments where imported or other goods in bulk are made up in packets, but no actual manufacturing is done, only the value added to the material by the operation should be shown in Part E, Item 14 B. This value may be ascertained by subtracting the cost of materials used, wrappings, etc., from the wholesale selling value of the finished goods.

19. *Meat Works.*—Amounts paid to employees, temporary or permanent, in their capacity as train attendants, cattle buyers, or in any other way connected with bringing the stock to the factory, should not be included as salaries or wages in return. By valuing live stock at the cost landed at the factory (Part D) such costs are automatically included.

20. *Bakeries.*—Carters and all persons engaged solely in delivery and in selling the commodities produced should be excluded. The output value should be the selling value of bread, etc., made, less all delivery and selling costs.

21. *Cold Storage.*—The value of the commodities placed in the cold store should not be included in the cost of materials used (Part D) nor in the value of the output (Part E). The latter value should be shown in Part E, Item 14 B, and should include the actual labour cost, the cost of fuel and power used, any additional expenses of storing, and profit made on such work.

22. *Brick, Pottery and Tile Works.*—The value of materials used shown in Part D must include wages of pitmen and all other costs incidental to obtaining clay and delivering at the kiln. The value of the kiln must be included as part of your plant and not as a building.

23. ***If any difficulty arises the Government Statistician will be pleased to furnish additional information, either by letter or telephone.***

NOTE.—Materials in above table include fuel, and wages include salaries paid. The balance is in general the proportion which accrues to the proprietors or general purposes including depreciation, taxation, Workers' Compensation, &c., and profit, but in some cases, *e.g.* rubber, the total value represents only the value at which products are passed on to the sales department.

No. 15.—Value of Factories, Machinery, Materials, Wages, and Output, 1938–39.

Religious Instruction.—Under the Public Instruction Act (43 Vic. No. 23), which came into force on 1st May, 1880, it is provided that the instruction imparted at Public Schools must be absolutely unsectarian. "Secular instruction" is defined by the Act as including "general religious teaching as distinguished from dogmatical or polemical theology." Provision is made for authorised teachers of any denomination to give religious instruction at specified hours to the scholars belonging to their religion, and separate class rooms are provided generally for this purpose. The total numbers of visits paid by authorised teachers to State schools during 1938 and 1939 were respectively, 159,166 and 163,299, namely:—Church of England, 64,961 and 65,199; Roman Catholic, 20,450 and 22,655; Presbyterian, 24,346 and 25,481; Methodist, 29,581 and 30,009; other Denominations, 19,828 and 19,955.

Subsidised Schools.—Subsidies are granted only in the case of children resident in thinly-populated country districts, so far removed from any public school that attendance is impracticable. The conditions are that where a private teacher is engaged by two or more families in combination, or by a single family with not less than three children of school age, such teacher, if approved by the Minister, may be paid subsidy as follows :—

"In the eastern portion of the State at a minimum rate of £30 per annum, based on the average monthly attendance, such aid not to exceed £110 yearly. In the western section the minimum and maximum rates per annum are £33 and £120 respectively. For payment of subsidy the State is divided into eastern and western portions based on the climatic line adopted by the Department of Public Instruction for vacation purposes.

These courses meet a distinct demand for the super-primary education of children attending schools in more or less sparsely-populated localities. The number of schools engaged in this work at the end of 1939 was 472, having an effective enrolment of 5,184 post-primary pupils, with an average attendance of 4,270.

There are two teachers' colleges, one at Sydney and the other at Armidale.

The Teachers' College, Sydney, provides various courses preparing students for positions as rural school teachers, primary, kindergarten, domestic science and secondary school assistant teachers. Courses range from two to four years, five years in certain cases, leading to graduation in Arts or Science. However, during 1938 special short courses of training for artisan teachers were completed by some students. In addition to academic work at the College, students are given practical work in the Demonstration Schools at Forest Lodge, North Newtown, and Haberfield, and at selected supplementary practice schools. The number of volumes in the College Library is 48,939.

The Teachers' College at Armidale was established in February, 1928, with the object of training country students. The course extends over two years only. In 1938 the enrolment consisted of 190 first year and 161 second year students. The number of volumes in the College Library is 7,211.

Metropolitan Loans.—283 works are on loan to various Government departments and institutions in the city and suburbs.

Country Loans—180 pictures are distributed amongst 16 country towns and 2 local hospitals in the State.

Art Students.—Art students desirous of making studies of works in the Gallery may do so under certain regulations.

Wynne Art Prize.—Instituted in 1897, and consists of the interest on approximately £1,000, bequeathed by the late Richard Wynne. The prize, which is under the control of the trustees of the National Art Gallery, is awarded annually to the Australian artist producing the best landscape painting of Australian scenery in oils or water-colours, or the best production of figure sculpture executed by an Australian sculptor.

Archibald Prize.—Bequest in the estate of the late J. F. Archibald. An annual prize instituted in 1921 for the best portrait " preferentially of some man or woman distinguished in art, letters, science, or politics, painted by any artist resident in Australasia."

The Sir John Sulman Prize.—This prize was founded by the widow and family of the late Sir John Sulman. It is derived from the proceeds of the investment of £2,500 and is awarded annually for the best subject of genre painting or mural decoration, or design for an intended mural decoration, done by an artist resident in Australia for two years preceding the date fixed by the trustees for the presentation of the pictures for inspection.

Marshall Gift Fund.—Income from property given by Mr. and Mrs. Thomas Marshall to be applied for the purchase of works of art.

E. W. G. de Gyulay Bequest.—Under the will of the late E. W. G. de Gyulay, the Trustees of the National Art Gallery were left a legacy of £250 to purchase a picture by an Australian Artist depicting some phase of Australian life, but not a landscape or seascape, on condition that such picture is to be marked as a gift from the testator.

WAGES.

No. 94.—Rates of Wages in Various Industries at 31st December, 1939.

The Rates of Wages, shown in the following table, are the minima prescribed by awards of Industrial tribunals or by registered agreements, in terms of the industrial arbitration laws of the State of New South Wales or of the Commonwealth of Australia. For a few occupations, for which wages are not prescribed by award or agreement, average ruling rates have been stated. The rates relate to the metropolitan district except in the following cases:—Mining, shipping, agricultural and pastoral industries, and certain works in country districts for which special awards have been made, viz.: cement works at Portland and the iron and steel works at Port Kembla and Newcastle.

Living Wage and Family Allowances.—The wages prescribed by awards and agreements are based on a "living" or "basic" rate of which details are shown in Table No. 95. Where there is more than one dependent child under 14 years of age in the family, allowances may be paid by the State, in terms of the Family Endowment Act, to supplement the family income. The maximum rate is 5s. per week for each such child (except one) in the family, and the amount is reduced where necessary so that it will not raise the family income (as defined by the Act) above the amount of the living or basic wage, plus 5s. a week for each child for whom endowment is payable.

Hours of Work.—In industries within the scope of the State Industrial Arbitration laws the hours are prescribed by the Industrial Commission of New South Wales. In the Commonwealth jurisdiction, the hours are prescribed by awards and agreements. The general standard is 44 hours per week.

No. 95.—Living or Basic Wages—1927 to 1940.

The wage-regulating tribunals exercising jurisdiction under State or Federal law base their determinations upon "living" or "basic" wages which represent the minimum rates which may be prescribed for adult unskilled workers. When the living or basic rates are varied on account of changes in the cost of living the rates of wages prescribed for adult workers by the awards or agreements affected are varied by the same amount of increase or decrease as the living wage.

Living Wage—State Awards and Agreements.—The determination of living wages for men and women was a function of the Industrial Commission of New South Wales from 1926 to 1937. The determinations applied generally throughout the State to all industries within the jurisdiction of the Commission and the rates were subject to adjustment in April or October in each year to accord with increase or decrease in the cost of maintaining the standard of living determined by the Commission. In October, 1937, the law was amended to prescribe that the basic wages of the Commonwealth Court of Conciliation and Arbitration be adopted for the purposes of State awards and agreements, provision being made for assessing rates for various districts according to the practice of the Court. The basic wage for women is usually proportionate to the rate for men, viz., 54 per cent. calculated to the nearest 6d.

Family Allowances.—For reference to family allowances, see Table No. 94.

Basic Wages—Commonwealth Awards and Agreements.—In the Commonwealth jurisdiction the basic wages, method and dates of adjustments are not identical in all awards and agreements. These matters are determined for each award or agreement with regard to the circumstances of the industry, the districts to which the award applies, etc. The basic rates shown below are fairly representative of those prescribed for the districts specified by the majority of the Commonwealth awards and agreements which provide for quarterly adjustments of wages according to the index numbers of retail prices in Sydney, New South Wales. In June, 1937, the Commonwealth Court decided to add a fixed loading to the basic wages assessed according to the retail price index numbers, and to issue its own series of index numbers based on those compiled by the Commonwealth Statistician which were used formerly. Consequently, the basic wages now consist of a "needs basic wage" which is adjustable at intervals specified in the award or agreement, and a loading (5s. or 6s. per week in New South Wales) which remains unchanged.

BASIC WAGES PER WEEK—STATE AND COMMONWEALTH AWARDS AND AGREEMENTS—FROM OCTOBER, 1937.

The basic wages (men) for the districts of Sydney, Newcastle and Port Kembla-Wollongong are assessed and adjusted according to the retail price index numbers for Sydney, and the rates for the County of Yancowinna according to the retail price index numbers for Broken Hill. The rate for other localities is 3s. less than the Sydney rate. The fixed loading is 6s. per week for men and 3s. 6d. per week for women.

The rate for Crown employees in all districts is assessed and adjusted according to the weighted average index numbers for the five towns (Sydney, Newcastle, Broken Hill, Goulburn, and Bathurst) and the fixed loading is 5s. per week.

Gross and Net Value of Estates.—The figures from the Probate Court and from the Stamp Duties Department (see Part "Public Finance relating to transactions in the estates of deceased persons do not agree. The Court gives the gross value of the estates, and includes those estates which, after investigation, are found not to be subject to duty. The number of petitions is also swollen by probates and letters of administration on some estates being taken out a second time. The amount given by the Stamp Duties Department represents the net value of the estates.

NOTE.—This table does not include iron made from scrap, valued, to 31st December, 1938, at £1,416,030; lime, valued at £2,014,008; Portland cement, valued at £25,484,001, and coke valued at £19,808,887.

The figures represent the value of minerals won during the year, and not the value at the mines, and before treatment, of the output from mines in operation during the year.

* Includes all quarries from 1925. Prior to 1925 only those held under mining title were included.

Section II.—VITAL STATISTICS.

NOTE. (1) From the beginning of 1927, the basis of tabulation for births and deaths for any subdivision of the State has been according to usual residence; consequently in this issue comparison of these figures for any division cannot be made with those for years prior to 1927. Marriages have always been tabulated according to the place of celebration.

(2) From the beginning of 1929 the municipalities of Auburn, Bankstown, Granville, Lidcombe and Parramatta were included in the Metropolis, and from the beginning of 1933 the Municipalities of Dundas, Ermington and Rydalmere, and Pitt and Merrylands wards of Holroyd municipality.

(3) Commencing with 1933, full-blood aboriginals have been excluded.

*From the beginning of 1927 deaths have been allocated to the locality in which the deceased usually resided when known, consequently these figures are not comparable with those published for years prior to 1927.

† From the beginning of 1929 the municipalities of Auburn, Bankstown, Granville, Lidcombe and Parramatta were included in the Metropolis, and from the beginning of 1933 the municipalities of Dundas, Ermington and Rydalmere, and Pitt and Merrylands wards of Holroyd municipality; consequently the figures for the Metropolis for 1929 and subsequent years cannot be compared with those of previous years.

*From the beginning of 1927 deaths have been allocated to the locality in which the deceased permanently resided when known. consequently these figures are not comparable with those for years prior to 1927. Deaths of children who died without leaving the institution in which they were born are allocated to the residence of the mother.

NOTE—See note (2) prefixed to Table No. 21.
